

July Update

MEINHARDT IN FOCUS

Although located in the heart of Bangkok, delivering our engineering excellence to different parts of the country is never an obstacle for Meinhardt Thailand. **Pattaya in Chonburi is one of the strategic locations.** Meinhardt has provided engineering services to **more than 40 developments** so far in the area, ranging from Industrial Facilities, Hotels & Residential, Retail & Malls and most recently one of England's finest and most prestigious independent schools, The Rugby School Thailand, due to open later this year.

“Chonburi Province and Pattaya City itself has been constantly growing and will surely continue to do so. Together with the promising **Eastern Economic Corridor Development Plans** that is already home to many of the world's leading manufacturers, Thailand's energy industries and tourist destinations, the area will serve as the next major economic zone of ASEAN. Meinhardt's strong teams of Engineers and Project Managers are excited to continue delivering the best engineering services and be the key contributor to such developments.”

John Pollard
Managing Director
Group Regional CEO - South Asia

PROJECT IN FOCUS

Adding to our strong track records in educational institutions, Meinhardt is proud to be providing C&S, MEP Engineering and Infrastructure Services to **the prestigious Rugby School Thailand (affiliate of Rugby School UK).**

The renowned education provider is soon to be ready to welcome students in this coming semester. Rugby School Thailand is located on an expansive, 190 rai site in Banglamung, Chonburi where students can enjoy full facilities and activities, such as auditoriums, sport halls, swimming pools, play areas, a private 11km bicycle track, sailing, and golf.

“With Meinhardt's best engineering services, together with excellent harmony between the developed countryside of Chonburi, Thailand; and the guaranteed standard of education from Rugby School UK, rest assured that students will receive a distinctive education and great life experience.”

Sasiporn Sirilatthaporn
Director

STAFF IN FOCUS

Every year during the summer months, Meinhardt continues to support future engineers by welcoming **engineering students** from both Thailand and International Universities for an **Internship Programme.** This year, we welcomed 17 students, offering them an opportunity to work with our Engineers to gain real work experience in different departments of Meinhardt Thailand.

“Future developments coming in the pipeline throughout Thailand and the region need the next generation's skills and well-groomed experience. We look forward to seeing these young students engineer the future.”

John Pollard
Managing Director, Group Regional CEO - South Asia

FACT IN FOCUS

Do you know that: Eastern Economic Corridor includes 3 Provinces; Chachoengsao, Chon Buri and Rayong. EEC is now home of 5 oil refineries, 3 petrochemical complexes, 20 power plants, 29 industrial estates. Furthermore, 21 industrial estates are ready to invest and 6 industrial estates are under development. This reflects the immense number of Industrial Engineers that will definitely be sought after in the near future!
