

February Update

MEINHARDT IN FOCUS

At Meinhardt, we value each and every one of our staff and believe that our people are the reason for our success. In return for pursuit of engineering excellence, we occasionally want to have some fun.

To celebrate the new year, we recently held the **Meinhardt Thailand Staff Party 2018** at the Novotel Bangkok Sukhumvit 20, giving our management and staff the opportunity to enjoy and mingle in less serious surrounds. Other annual activities include a Company Trip, bi-monthly Happy Hour, Sport Events, and CSR activities affording our staff the pleasure of giving back to the community.

PROJECT IN FOCUS

It is great to see our projects take shape. The latest project that makes us proud is the new **Four Seasons Private Residences Bangkok at Chao Phraya River**. Developed by Country Group Development PCL, the 73 storey “supertall” tower is Bangkok’s 3rd tallest building and Meinhardt Thailand’s first “super-tall” tower. Recently, Meinhardt Thailand’s Managing Director, **Khun John Pollard participated in the official top-off ceremony at the roof top, 305 m above Bangkok.**

This waterfront development has 355 super-luxury residential units and over 4,000 sq.m. of common facilities and amenities.

Meinhardt Thailand is providing C&S, MEP, and Façade Engineering Design services for the tower and also for the two-neighboring luxury hotels; Four Seasons Hotel Bangkok and Capella Bangkok.

STAFF IN FOCUS

This month we feature our Director, **Khun Theera Wattanasup**. Khun Theera joined Meinhardt Thailand in 1994 soon after graduating from the USA where he undertook a Master’s Degree.

In addition to Civil & Structural engineering design of buildings, Khun Theera also has been extensively involved in developing Meinhardt’s capabilities in project management and construction management. As a result, he has been instrumental in delivering some of Meinhardt’s largest projects where Meinhardt has taken the role of Lead Consultant – not only undertaking the design but also managing tender process and construction.

Aside from his utmost dedication and work ethic, Khun Theera is also the President of Meinhardt Thailand’s Social Committee, overseeing Meinhardt’s leisure clubs & activities.

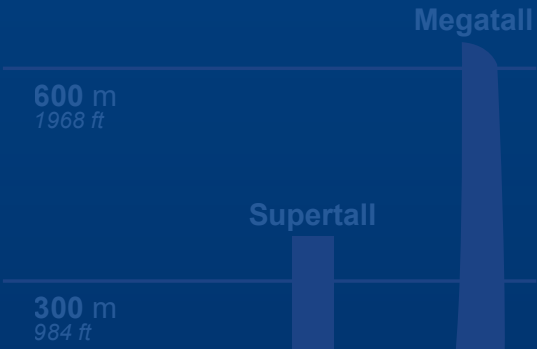

Theera Wattanasup
Director

FACT IN FOCUS

Did you know that according to the Council on Tall Buildings and Urban Habitat (CTBUH), Tall buildings that achieve significant heights are classed into two additional sub-groups: “Supertall” - buildings over 300 meters in height, and “Megatall” - buildings over 600 meters in height. Currently, 127 supertall buildings and 3 megatall buildings have been completed globally. In Thailand, there are 4 “supertall” buildings. They are Magnolia Waterfront Residences at Iconsiam (315 m), MahaNakhon (314 m), Four Season Private Residences (305 m) and Baiyoke Tower II (304m).
