

March Update

MEINHARDT IN FOCUS

Now in its **7th year of operations**, **Meinhardt Myanmar** has well established itself as a **reliable engineering services provider**. Offering C&S, MEP engineering services, Project Management and Construction Management, the **50+** person office are able to deliver engineering designs on even the most complex of projects. Currently the team has been working closely with the Singapore and Bangkok office to deliver this month's feature project "The Garden".

"I am immensely proud of the progress we have made in just a short period of time. The quality of engineering being produced out of the Yangon office is second to none."

*John Anderson
Managing Director - Meinhardt Myanmar*

PROJECT IN FOCUS

The Garden, in Yankin Township, is Yangon's latest mega Development. Designed and constructed by Japan's Kajima Corporation, the 173,200 sq.m. project is shortly to commence construction. This large mixed-use project comprises of 3 towers; a 22-storey Hotel, 29-storey Long Stay Hotel and 21-storey Office building. The towers sit atop a 3 level basement levels and 2-storey Retail podium. The Garden features extensive use of landscaping and will serve as a model project to showcase Japanese urban planning expertise.

With our local expertise and unrivalled Myanmar experience, **Meinhardt is providing C&S and MEP Engineering design services to the project.**

STAFF IN FOCUS

This month we feature **Naing Koe Thu**, Project Manager and Construction Manager who works at Meinhardt Myanmar. Naing joined our Yangon office in 2016 after graduating with a Bachelor of Engineering (Civil Engineering with Honours) from Monash University, Australia. Prior to joining Meinhardt, Naing spent 2 years working in Australia in different fields from real estate management to onsite supervision and inspection of small-sized construction and fit-out projects. With his diverse work experience and knowledge of OH&S practices in project & construction management, **he has been delivering projects with 'zero accidents'.**

"Our proven track record in delivering projects in Myanmar is the result of strong team work from all our staff."

*Naing Koe Thu
Project Manager and Construction Manager*

FACT IN FOCUS

Did you know that: Municipal or Urban Engineering is the study of the design of municipal infrastructure. Municipal and Urban Engineers specify, design, and maintain streets, sidewalks, water supply networks, sewers, street lighting, municipal solid waste management and disposal, storage depots for various bulk materials used for maintenance and all public works. It also includes the environmental issues and tasks that contribute in the quality of life of the society.
